German Pool

DSX Instantaneous Electric Water Heater is fully electronically controlled with Twin Temperature Control (TTC[®]) that ensures precise hot water supply between 20°C and 60°C for energy efficiency. It can be applied to single or multiple points. Multiple Power System (MPS[®]) allows users to select the desired power rating upon installation (18-27 kW). It is compatible with solar heating systems, and comes with colour LCD display and optional remote control.
