CENTRO has introduced photo catalyst coating to help purify air at your home

The photo catalyst coating effectively reduces inhaling harmful chemicals and gets you and your family protected.

This nano technology has been widely adopted in Japan, Korea and Taiwan for more than eight years. It decomposes both the harmful organic substances and some of the inorganic ones. Its oxidizing properties enable it to kill germs and purify air, which also comes with a little light indicator to show you how effectively it works!

German Pool Professional High-Speed Food Processor - Always Fresh & Safe

As plasticizer-tainted food draw public concern recently, home-made fresh drinks are getting more popular. To make your own healthy drinks, German Pool's newly launched Professional High-Speed Food Processor PRO-10 is an ideal choice.

The 30,000 RPM high-speed motor of German Pool PRO-10, coupled with the unique "Phyto-Rich" programme, is effective in liberating phytonutrients from fruit and vegetables to boost your health. You can make juice, as well as smoothie, soy milk, soup, dessert, sauce, baby food and elderly food by simply turning iDial jog wheel towards the desired preset programme. Designed in Italy, the colourful PRO-10 is versatile and good for both hot and cold dishes. So you can now make fresh drinks and food in a safe, healthy and simple way!
