Go automatic!

Now there is a playful way to store your dishes, from German Pool.

By that we mean the automatic moving cabinet, the latest invention by German Pool to keep your kitchen neat and tidy.

From now onwards, you no longer have to worry about not being able to reach your cabinet hanging high on the wall for this electronic version can automatically adjust the height of the shelves, as desired by the user, to create easy accessibility to the contents.

You can pick any items you want without an effort, or conceal them completely when you're finished, all at just one touch of a button.

This convenient and stylish design does not compromise capacity – it can hold as much as 25 kg of items including small

kitchen appliances such as microwave oven, toaster and mini-oven.

If that is not high-tech enough to satisfy your need for absolute convenience, why not also equip your kitchen drawers with a built-in motor that gives them an automatic press-and-spring function?

With this touch-sensing function, your drawers glide open at a soft press by any part of your body, even your knees and feet, if your hands are occupied with dishes, giving 'multi-tasking' a new definition!

Visit the brand's Kitchen Cabinetry & Home Appliance Centres today, in Wanchai and Tokwawan if you can't wait for a taste of technology!
