Conventional hydraulic instant water heater

Save **30%** Energy  
German Pool electronic instant water heater

Suitable for  
**SOLAR**  
System

**Energy Saving**

No standby heat loss and no hot water is stored, water is heated to the exact temperature only when needed, providing a max flow of 13.8L/min and saving up to 30% of energy.

**Precise Water Temperature Setting**

With the TTC® Twin Temperature Control technology, temperature can be precisely set to the nearest 0.5°C to maximize comfort via the LCD colour control panel.

**Solar System Compatible**

The Instantaneous Electric Water Heater is fully compatible with solar heating system where inlet water temperature can be as high as 70°C.

**Convenient and Multi-point Use Friendly**

Optional remote control also available to provide easy operation if the water heater has to be installed in an inaccessible position, excellent for multi-point application.

# INTELLIGENT GREEN LIVING

*Making your life easier,  
advanced home appliances  
save your time and money*

An instant water heating system in your bathroom, boasting precise electronic control, simple operation and high energy efficiency, brings you an effortless bathroom experience.

Economical and eco-friendly, the all-new German Pool Instantaneous Electric Water Heaters provide reliable hot water whenever you want, and at the exact temperature you want. More importantly, you are actually saving our planet when you are taking a shower with its energy-saving nature. 100% made in Germany, the Instantaneous Electric Water Heaters have won numerous international eco-design awards.

A popular model of the series, the electronically-controlled DEX, adjusts water temperature with ambient temperature and flow rate. You can also change the water temperature by using the touch keys. Two programmable buttons also allow quick access to your favorite temperature settings for you to enjoy comfortable bathroom experience.

Equipped with SERVOTRONIC® dynamic flow control and IES® bare wire heating system, DSX offers a practical digital screen to show useful information like temperature, energy consumption and error warnings to ensure that you have full control of your hot water supply.

On the other hand, the hydraulically controlled GPI-M5 boasts an IES bare wire heating system and provides instant supply of hot water which saves up to 85% energy consumption, matching the line's environmentally-friendly philosophy.
