DO IT YOURSELF:

NOODLE MAKER

Italian pasta, Japanese ramen, Chinese noodles, to name a few, Hongkongers always have a strong affection for these basic yet intimate comfort foods. Instead of queuing in front of renowned restaurants, why not make it yourself for a simple, personalized and healthy version right at your home?

Sometimes we are wowed by the skillful performance of noodle masters kneading and stretching the dough, but with the help of modern inventions today, every time-strapped city dweller can find it possible and easy to make homemade meals entirely from scratch.

The brand new Automatic Dough and Noodle Maker proudly presented by German Pool is an innovative and user-friendly kitchen gadget to get you one step closer to not only eating easily, but also eating healthily.

Simply inputting the fresh ingredients including flour, water and eggs, the Noodle Maker will automatically create different kinds of dough and noodles that suit your personal taste. The patented 2-in-1 kneading and noodle extrusion design mixes the flour, kneads the dough with a 360-degree hand-kneading technique, extrudes and dries noodles all in one for your full enjoyment of homemade, preservatives-free noodles.

You can also experiment with different ingredients to add fun for your cooking moments. From corn extract, tomato sauce, bamboo extract to other healthy components, the machine is ready to bring endless possibilities to your plate. Equipped with six nozzles that are easy to swap, it allows users to be creative and also saves your precious time with friends and family.

Practical and detail-oriented, the Noodle Maker's patented extrusion mechanism allows downward extrusion while the built-in fan dries noodles and prevents tangling. To guarantee a smooth noodle production process, German Pool offers a full set of accessories for your ultimate convenience.
